SUMMARY

Experienced Software Engineer and Game Developer with a strong background in C#, Unity, and modern technologies like Git and SmartSVN. Skilled in developing high-performance applications and interactive game systems with a focus on scalability, stability, and user experience. Expert in debugging game code, optimizing, and enhancing application performance while collaborating effectively with cross-functional teams to deliver quality projects within deadlines.

WORK EXPERIENCE

UI/UX Collaborator, Evolve X, Islamabad

Feb 2024 - July 2024

- Created software solutions at Evolve X, supporting e-commerce, digital marketing, and social media projects.
- Collaborated with team members to implement features based on client requirements and project specifications.
- Performed debugging, testing, and optimization to ensure stable, efficient, and high-quality application performance.

Software Engineer, Genl Team Solution, Lahore

Feb 2023 – Feb 2024

- Worked on high-performance applications using C# and Unity, ensuring scalability, stability, and a seamless user experience.
- Collaborated with cross-functional teams to implement features, troubleshoot issues, and deliver projects within defined timelines.
- Optimized system performance through efficient debugging, testing, and code improvements, enhancing overall application reliability and quality.

Associate Software Engineer, Genl Team Solution, Lahore

Jan 2022 – Feb 2023

- Assisted in the development and implementation of application features using C# and Unity, contributing to overall product functionality and performance.
- Supported debugging, testing, and issue resolution to ensure stable and reliable application builds.
- Collaborated with senior developers and team members to meet project requirements and deliver tasks within established timelines.

PROJECTS

- **Real Estate Tycoon**
  I worked on implementing new features, User Interface, testing and debugging the game.
- **Birth Centre Tycoon**
  I worked on implementing new features on every update and debugging all the test cases. I have achieved releasing every game update on time.
- **Fashion Tycoon**
  I was part of the main developer team and implemented new features as well.
- **Pull the string**
  I worked on creating and designing levels and making the game visually appealing.
- **Scary Teacher 3D**
  This is a simulation game. I worked on creating immersive visuals using timeline and implemented some features like mini game.

SKILLS

- C# & Unity Development
- Web Development
- Software Debugging & Performance Optimization
- UI/UX Implementation
- Cross-Functional Team Collaboration

EDUCATION

Bachelor of Science in Computer Science, NFC Institute of Engineering & Technology, Multan

- Earned a Bachelor of Science in Computer Science from NFC Institute of Engineering & Technology, Multan.
- Built a strong foundation in programming, software development, and core computer science concepts.
